System 76 - AluClip Zero Residential Door

The new patent pending AluClip Zero residential door provides a flush mounted, floating aluminium panel within the door system to replicate the sightlines of the AluClip Zero window variants. This design feature ensures complete stability regardless of temperature extreme, offers impressive weather resistance and also provides Passivhaus levels of performance.

System 76 - AluClip Zero - Residential Door

Innovation and Energy Efficiency

System 76 is arguably the most complete and comprehensive PVCu window system in Europe, reflecting KÖMMERLING's reputation for product design and the patent pending AluClip Zero residential door brings in a new design perspective. This fully supports the three window variants and offers limitless possibilities in terms of external finish and design.

KÖMMERLING and parent company, profine Group, lead the way in Europe with their lead-free Greenline compound that was developed over 15 years ago. They were one of the first companies in the sector to remove lead in PVCu profiles and continue to operate to the latest ISO14001 environmental standard and also use recycled materials in certain dedicated systems.

- 1 Introducing the market-defining System 76, harnessing 6 & 7 chambered aluminium/PVCu hybrid design.
- 2 Suitable for high performance residential door prefabricated panelling, 36–86 mm thick.
- 3 Extraordinary thermal insulation with U_D values within the Passivhaus range of $0.80 \text{ W}/(\text{m}^2\text{k})$ or lower.
- 4 Floating panel design, optimises thermal stability.
- 5 Almost unlimited choice of colour of the aluminium covers due to finishing techniques such as paint, anodised or powder finishing.
- 6 Triple seal gaskets offer impressive resistance against wind and rain.
- 7 Wide range of panel options for both contemporary and traditional design appeal.

An Extensive Range of Finishes

The AluClip Zero variants of System 76 open up a wide range of possibilities, thanks to an aluminium exterior that's available in literally hundreds of different painted, powder coated and anodised finishes for the most exacting of projects. The inner face of the PVCu profile can also benefit from a wide range of colours and foiled finishes. Whatever the requirements, there's a KÖMMERLING finish to match.
